PROFESSIONAL EXPERIENCE

Clerk & Laboratory Aide
Visayas State University Hospital, Baybay City | 2023 - 2024

- Spearheaded the development of the Radiology Information System (RIS), achieving:
  - 43% faster patient documentation.
  - 99% improvement in X-ray result encoding and printing speed.
  - 67% quicker release of X-ray results.
  - 70% overall enhancement in departmental workflow efficiency.
- Digitized and prepared X-ray films for official reading, optimizing the accuracy and accessibility of imaging results.
- Analyzed and processed large datasets to generate critical reports, including:
  - Patient and examination censuses
  - Income summaries
  - Doctor's professional fee summaries
- Delivered actionable insights and strategic recommendations based on data analysis, driving informed decision-making within the department.
- Assisted clients throughout the registration and examination process by addressing inquiries and efficiently guiding them through the necessary procedures.

Information Systems Analyst I
Philippine Statistics Authority, Cebu City | 2022 - 2023

- Developed and implemented an appointment system for trip ticket requests, streamlining operations significantly.
- Managed user access and credentials for over 50 personnel, enhancing system security and user management efficiency.
- Provided frontline technical support by troubleshooting and escalating registration process issues, ensuring smooth operations.
- Monitored Philsys system reports and documented technical problems for timely resolution and stability.
- Led logistics management for the secure transport and deployment of registration kits and supplies across multiple locations.

Registration Kit Operator
Philippine Statistics Authority, Cebu City | 2022

- Ensured data integrity by verifying and validating client information during registration, maintaining consistent data quality.
- Engaged with clients directly, offering guidance and support throughout the registration process while addressing inquiries effectively.
- Performed system troubleshooting and resolved technical issues with registration kits, ensuring uninterrupted operations.
